Summary

B.Sc. in Computer Science & Engineering graduate combining front-end engineering with large-scale digital content creation. Experienced in building modular web interfaces with React.js, configuring relational data architectures with MySQL, and managing network routing and cloud deployments via Cloudflare, Vercel, and Netlify. Proven track record of scaling independent digital media platforms to over 30,000+ active subscribers, effectively aligning modern tech stacks with high-impact communication.

Experience

Puraotn Pothik
Founder
Rajshahi

- Architected and maintained web portals (puratonpothik.com) and e-commerce infrastructure with integrated SEO indexing.
- Scaled digital media reach to an audience of 30,000+ active subscribers through data-driven content workflows and post-production.
- Engineered and negotiated commercial brand partnerships and digital sponsorship campaigns.

Projects

MistriChai Service Platform
july 2026
Developed a responsive front-end interface utilizing React.js, allowing users to browse and request on-demand services. Integrated a MySQL database to securely handle user authentication and booking statuses. Accelerated the development cycle by utilizing AI coding assistants like Claude Code and Lovable to rapidly prototype UI components. Built an interactive user dashboard for tracking service history.

https://github.com/Rupok-Khan/MistriChai

Puraton Pothik Web & Media Platform
april 2024 to present
Designed and managed a content-driven WordPress website focused on local history and wildlife. Implemented SEO strategies and indexing via Google Search Console. Scaled the

associated digital media channels using AI-assisted video and audio generation tools.

Hostel Mess & Expense Management Dashboard
Built a comprehensive management dashboard tailored for student hostels to track daily expenses (hisab) and automate complex meal cost calculations. Utilized front-end frameworks for a clean user interface and integrated a MySQL database to securely manage user profiles, daily meal logs, and financial tracking. *(Source Code available on GitHub)*
